

The three Colombian Andes: Central, Western and Eastern Cordillera plus Chocó bio-region and Cauca valley river specialties.

Endemics Everywhere !

14 birding days

Chestnut capped Piha - Photo: Edwin Acevedo

Introduction

The Andes, a sui generis mountain ecosystem and one of the most biodiverse on the earth; when the Spanish conquerors arrived to this land they were astonished with unparalleled nature and complex geography.

Home of precious flying jewels in the form of Hummingbirds, colorful and lovely Tanagers, enigmatic Tapaculos, shy Antpittas; charismatic Puffbirds and Fruiteaters, gracious Parrots; powerful raptors and many other feathered forms displaying every morning diverse and complex songs through the mist of the forest, thanking for a new day; while others dive in active mixed flocks scrutinizing every neck of the woods.

Colombia was honored with these three Andes, that in general, share similarity species; but at the same time exhibit outstanding different species, especially when you compare both slopes of each mountain range, that's way you will find specialties everywhere what makes of this tour a must in the neotropic; it offers you the opportunity to find those bird singularities and richness, since we visit the best spots in the country to find the endemic, near endemic; highlights and those ones that you would enjoy every time if you had the chance. Let you delighted with the color, sounds and forms of our avifauna where surprising explosive mixed flocks and breathtaking views of quiet species that will catch us for unforgettable moments.

We will be moving from premontane to Páramo ecosystem, passing through montane and highland forest with a bonus of some specialties from dry forest in Cauca river valley.

In general the temperatures ranges in premontane forest: 18-24 °C/64.4-75.2 °F, montane forest: 6-12 °C/42.8-53.6 °F and highland forest to Páramo ecosystem: 5-10 °C / 41-50 °F.

Welcome to meet the Andean Colombian birds !

Itinerary

Day 0: Pick up at the airport in Medellín and then hotel and some info to contextualize.

Hotel: Hacienda hotel La Extremadura - HW, Wifi, AC available

Day 1: We left the hotel heading to a dam area called **Porce** (Premontane forest), here there chances for: Sooty Ant-Tanager (E), Tody Motmot, Slaty-winged Foliage-gleaner, Black-crowned Antbird, Great Antshrike, Purple-throated Fruitcrow and some aquatic species.

Broad-billed Motmot - Photo: Edwin Acevedo

Then we continue to the northern of the Central Andes to **Piha Reserve** (Premontane forest), in Anorí municipality; it is located on an area where a tremendously rare and very restricted bird was discovered some years ago: Chestnut-capped Piha, endemic to the country and only found in some localities around this area and no other place in Colombia; this reserve was created to preserve the habitat of this species.

Medellin-Porce: 2 hours drive. Porce-Piha: 1:30 drive.

Night: Piha lodge - HW, Wifi available

Day 2: We will be spending all day on the trails reserve, putting our attention to meet the main protagonist of the reserve: Chestnut-capped Piha (E), and also others of high interest: Stiles's Tapaculo(E), Parker's Antbird (E) Purplish-mantled Tanager (NE), Sooty-headed Wren (NE), Moustached Puffbird, Uniform Antshrike, Plain Antvireo, Chestnut-crowned Gnateater, White-winged Tanager, Black-winged Saltator, Yellow-throated Bush-Tanager and many more.

Night: Piha lodge

Day 3: This morning while having an invigorative breakfast on the outdoor eating room in the lodge, we can delight with: White-necked Jacobin, Green-crowned Brilliant, White-bellied Woodstar, Collared Inca, Brown Violetear, Steely-vented Hummingbird, Andean Emerald; Bar-crested Antshrike (NE), Scrub Tanager (NE), Speckled Tanager; after, we will work on a different trail this morning for some species missed the day before.

After lunch we left to Medellin city doing some birding stops on the way back for: White mantled Barbet (E), Black-headed Brush-finch (NE).

Red-bellied Grackle - Photo: Edwin Acevedo

Night: Hacienda hotel La Extremadura - HW, Wifi, AC available

Day 4 : Early in the morning we will visit **La Romera reserve** in Sabaneta Municipality (Premontane to low montane forest), very near from Medellín city; there we will be enjoying flocks of the vivacious and endemic Red-bellied Grackle, the hiding Stiles's Tapaculo (E) and Colombian Chachalaca (E).

Sharpening our eyes we can find the lovely and near endemic Yellow-headed Manakin plus other species of premontane forest as: Greenish Puffleg, Emerald Toucanet,

Chestnut-capped Brush-finch, Common Chlorospingus, Russet-backed Oropendola and more wings.

Then we move to Jardín municipality; lunch on road restaurant and birding stop in **Cauca river valley** area (Dry forest) for its specialties, here we will be working on the endemics: Antioquia Wren which it is one of the last species discovered on field in Colombia; Grayish Piculet and Apical Flycatcher, after continue to Jardín municipality in Western Andes.

La Romera-Cauca River: 3 hours drive. Cauca river-Jardín: 1 hour drive

Night in Jardín: Hotel La Casona - HW, Wifi, AC available

Day 5 : Very early in the morning our birding begin in the Yellow-eared Parrot reserve for views of this endemic and endangered Parrot, we will be working all day long in the reserve for more birds as: Black-billed Mountain Toucan, Grass-green Tanager, Golden-crowned Tanager, Hooded-mountain Tanager, Green and Black Fruiteater, Sword-billed Hummingbird, Tourmaline Sunangel and many more birds of montane forest.

Black-billed Mountain Toucan - Photo: Edwin Acevedo

Night in Jardín: Hotel La Casona - HW, Wifi, AC available

Day 6 : This morning our targets focus on the small **Cock-of-the rock** reserve (Premontane forest) for insuperable close up of this classic and astonishing Andean bird on its lek , and we may meet also Crested Ant-Tanager (E), Colombia Chachalaca (E), Red-headed Barbet, Bronze-winged Parrot, Flame-rumped Tanager, Andean Motmot and more species of the coffee region.

Crimson-mantled Woodpecker – Photo: Edwin Acevedo

Andean Cock-of-the-rock - Photo: Edwin Acevedo

We will continue to the central Andes to Rio Blanco reserve in Manizales (Montane forest).

Jardín-Manizales: 4:30 hrs drive.

Night: Río Blanco lodge - HW, AC available

Day 7 : Without any doubt, the main reason to visit this place is to have very clear approaches of the Antpittas here: Brown-banded (E), Bicolored, Chestnut-crowned and Slate-crowned Antpitta are served in front for your delight; the birding keep its level with the enigmatic: Masked Saltator (NT), Golden-plumed Parakeet (EN), Sword-billed and Wedge-billed Hummingbird, Long-tailed Sylph, Buff-breasted Mountain Tanager, Blue-winged Mountain Tanager, White-capped Tanager, White-capped Dipper.

Chestnut-crowned Antpitta - Photo: Edwin Acevedo

Night: Río Blanco lodge - HW, AC available

Buff-breasted Mountain-Tanager - Photo: Edwin Acevedo

Day 8: We left the reserve very early in the morning to translate to a farm on the way to Los Nevados National Park: Hacienda el Bosque, here Gray-breasted Mountain Toucan is a good host, we will also work on the lovely, very restricted and localized: Crescent-faced Antpitta then continue

to **Los Nevados National Park** (Highland forest to Páramo ecosystem), here very restricted species are to be enjoyed; let's focus on nice views of the endemic and very restricted: Buffy Helmetcrest; with luck Rufous-fronted Parakeet (E)(VU), Tawny Antpitta hanging around, Andean Tit-Spintail, White-chinned Thistletail, Stout-billed Cinclodes, Sedge Wren and more.

Río Blanco-Hacienda el Bosque 1 hr drive. Hacienda-Nevados NP 40 min drive.

Our eyes will keep scanning for the majestic Andean Condor and Black-chested Buzzard-Eagle.

Slaty-backed Chat-Tyrant - Photo: Edwin Acevedo

After a hot beverage, we descent a little to the treeline zone to work in and around the hotel Termas (Highland forest) for real jewels: Black-thighed and Golden-breasted

Puffleg, both (NE) (NT), the filigrane made wings with: Rainbow-bearded Thornbill and also Buff-winged Starfronted, Great-sapphirewing Viridian Metaltail and many more.

Buff-winged Starfrontlet

Shining Sunbeam - Photos: Edwin Acevedo

After lunch, birding along of an old road for other species of montane forest as different species of Mountain Tanagers; then we continue to the Western Andes to Montezuma farm in Tatamá NP (Premontane to Montane forest).
